# **BIG** **DATA ANALYTICS** **WORKSHOP**

**24-Feb**  
**2018**

Career Scopes & Opportunities

**Venue: RKMVERI, Belur Math | Time: 9:30 - 17:00 hrs**

**BIG DATA ANALYTICS** incorporates strategies for assimilation, management, analysis and interpretation of large datasets. The field lies at the intersection of statistics, mathematics, computer-science and engineering, with a diverse range of applications including healthcare, finance, business analytics, smart-cities, bio-informatics. In recent years, development of sophisticated 'learning' algorithms coupled with the availability of massive datasets and facilitated by powerful and efficient computing infrastructures, have led to pioneering improvements in several applications.

With **UNDERGRADUATES** of Science and Engineering as the target audience, this **WORKSHOP** brings together leading data scientists from academia and industry to give an overview of the field, highlight the thrust areas of **research**, and present scopes and exciting career opportunities. **GRADUATES** and **UNDERGRADUATES** are urged to make best use this opportunity to increase their awareness in this burgeoning and promising discipline.
